MEMORANDUM FOR:

SUBJECT: Reported Photography of Unidentified Flying Objects

BC

1. It has come to my attention that a civilian [redacted] has been experimenting with new kinds of films and emulsions which he has been exposing through a telescope set-up in his backyard here in Washington. During the course of his photographic experiments in the last three months he managed, it is reported to me, to photograph on a number of occasions geometrically shaped flying objects as they passed between his telescope and the moon. I have not seen these photographs and have had no business to look for same but I have had them reported to me as a result of our investigation of [redacted] photographic process which reportedly delivers a very high degree of resolution. Incidental to the examination of some of these high resolution photographs at his home, one of my men, [redacted] did notice the objects reported and in questioning of the man found that he had photographed different groups at several different times during the past three months.

2. [redacted] However, I would not like to overlook some evidences of an often reported phenomenon which might be of interest to [redacted] and to the intelligence community generally.

BC, B3

3. [redacted] reports to me that the photographs of these objects were remarkably clear and certainly indicated a phenomenon for which he had no ready explanation and for which in the past he found some considerably amounts of interest particularly in [redacted]. I do not wish to get involved with [redacted] if there is no interest in [redacted] in these reported materials, and I would therefore welcome your counsel and suggestion as to how we might get our hands on these materials to examine them firsthand and to make a more complete analysis of them. [redacted] is exceedingly cagey in his handling of these materials and would not permit anyone to borrow any of these materials. He explained that he was currently out of work and that he had had a couple of recent contracts with the Air Technical Intelligence Center at Dayton. A contact with the Air Force reveals that he has no contracts which are

BC in effect at the present time. [redacted] appears to feel that he has some real evidence of the existence of unidentified flying objects in his photography and I am sure he would consider delivering them to somebody only for a price, yet unspecified. By copy of this

B3 memorandum to [redacted] I would bring him up to date on this subject in case you would like to take it up unilaterally with him.

B6 4. For background information it is also reported to you that
B3 our original contact with [redacted] was set up through [redacted] and therefore there is some information on him already available in their files. You are also undoubtedly aware that the House committee investigating outer space and space phenomena has recently been addressing itself to the problem of the unidentified flying objects and has been seeking to review the evidence for certain House representatives to determine what validity this concept might have. According to the best information I have at the present moment, after several hearings on this subject this committee has suspended its investigation for several months after which time it intends to reopen them.
